LEGEND NOTES:  
SEE ADDITIONAL SHEETS FOR MORE LEGENDS AND SYMBOLS AS MAY OCCUR PER SPECIFIC SHEETS, OR MAY DIFFER BY CONSULTANT LEGENDS ON CONSULTANT-PROVIDED SHEETS OR DRAWINGS.

GENERAL INFORMATION

CODE COMPLIANCE

BUILDING DESIGN AND CONSTRUCTION UTILIZES THE FOLLOWING CODES:

- 2022 California Residential Code (CRC)
- 2022 California Building Code (CBC)
- 2022 California Mechanical Code (CMC)
- 2022 California Electrical Code (CEC)
- 2022 California Plumbing Code (CPC)
- 2022 California Energy Code
- 2022 California Green Building Standards Code (CalGreen)

GENERAL

- All work to be in conformance with the codes as listed above and as adopted by the local governing agency, and any applicable local ordinances.
- All conditions and dimensions shown on the plans to be verified by the Contractor, any discrepancies that require clarification or revisions to be brought to the attention of the Building Designer/Architect/Engineer before commencing with the work.
- Contractor to provide the requirements of all structural detail callouts denoted as "TYPICAL" or "TYP" at specifically noted conditions and at all like conditions throughout the project, unless otherwise noted. All details on detail sheets titled as "TYPICAL", and not directly referenced on plans, to be incorporated at occurring locations throughout the project. Requirements of details not denoted or titled as "TYPICAL" to be provided at the specific location shown on the plan and adjacent areas as applicable. Requirements of details denoted as "SIMILAR" or "SIM" to be provided with differences as indicated or implied on referenced details and plans.
- Details may be depicted diagrammatically. For example, roof pitches, floor/roof/wall thicknesses, framing members, etc., may differ in scale from actual proposed conditions. Details to be understood in context with other drawings conveying architectural design intent.
- Structural design or review of temporary shoring, additional reinforcing, bracing, formwork, scaffolding, trenchwork, erection methods, etc. required for proper construction of the project to be the responsibility of the Contractor.
- Shop drawings are an aid for field placement and are superseded by the architectural drawings. It to be the responsibility of the General Contractor to make certain that all construction is in full agreement with the latest approved contract documents.
- Dimensions, unless otherwise shown, are to centerline of columns and beams, or to the face of concrete surfaces and rough framing.
- The contract drawings and specifications represent the finished structure, and, except where specifically shown, do not indicate the method or means of construction. The Contractor to supervise and direct the work and to be solely responsible for all construction means, coordination of trades, construction methods, procedures, techniques, safety, and construction sequence.

PRODUCT SUBSTITUTIONS

- Material substitutions to be submitted to the Building Designer/Architect/Engineer for review prior to use. Substitution reviews may require additional design costs. These additional costs to be paid by the person or company requesting the substitution.
- Substituted products to have ICC-ES approval and to be installed per product manufacturer's specifications. Substituted product materials, finishes, details, and installation to be of a nature similar to originally specified product so as to not conflict with any intended structural or architectural design conditions, whether depicted or implied on plans or specifications. The substituted product to have design values (i.e. design loads, impact resistance, etc.) which to be equal to or greater than the originally specified product. Any and all warranties offered by the originally specified product manufacturer for the item to be substituted to have similar warranties offered by the substituted product manufacturer. Submit to the Building Designer/Architect/Engineer a list of only the items to be substituted, complete with all pertinent material including but not limited to manufacturer's supplied design loads listed for the originally specified product and the proposed substitution product.
- 

ABBREVIATIONS

WHERE POSSIBLE, ABBREVIATIONS ARE AVOIDED IN PREFERENCE FOR VERBOSE, CLEARLY DESCRIPTIVE INFORMATION. HOWEVER, ABBREVIATIONS MAY EXIST IN SOME DRAWINGS AND SHOULD BE INTERPRETED IN CONTEXT OF THEIR USE ACCORDING TO THE LIST BELOW.

SEE GENERAL INFORMATION SHEETS FROM PROJECT CONSULTANTS AS ABBREVIATIONS MAY BE DIFFERENT FROM DIFFERENT DISCIPLINES OR CONSULTANTS.

PROJECT INFORMATION

PROJECT DESCRIPTION:  
SINGLE FAMILY ACCESSORY DWELLING UNIT TO BE CONSTRUCTED ON AN EXISTING SINGLE FAMILY RESIDENCE PROPERTY

ASSESSOR'S PARCEL NUMBER:  
XXX-XXX-XXX

ZONING:  
R-3

TYPE OF CONSTRUCTION:  
TYPE VN

FIRE SAFETY AREA:  
STATE RESPONSIBILITY AREA or LOCAL RESPONSIBILITY AREA (CHOOSE ONE AS APPLIES)

PROJECT ADDRESS:  
1234 MAIN STREET  
ANYTOWN, CA ZIPCODE

PARCEL AREA:  
?? ACRES  
?? SQUARE FEET

PROPOSED DWELLING AREA:  
?? SQUARE FEET

GARAGE AREA:  
?? SQUARE FEET

PROPOSED ROOF AREA:  
?? SQUARE FEET

(CONSIDER ADDING THE AREAS FOR ANY OF THESE ITEMS NOT ALREADY INCLUDED ABOVE, TAKEN FROM THE SONOMA COUNTY BUILDNG PERMIT ONLINE WEBSITE: e.g. dwelling area, garage area, covered porches, decks, retained square footage retained at the face of retaining walls, storage areas, basements, etc.)

SHEET OF SHEETS

The first step in the process of identifying a problem is to recognize that there is a problem. This can be done by looking at the current situation and comparing it to what you want to achieve. Once you have identified the problem, the next step is to define the problem more clearly. This involves asking questions such as "What exactly is the problem?" and "Why is it a problem?"

|        | CEILING PADDLE FAN                       |

### ELECTRICAL/LIGHTING PLAN NOTES

1. MAINTAIN A CLEARANCE OF 36" IN FRONT OF ELECTRICAL DISTRIBUTION AND SUB PANELS. (CEC 110.26)
2. PROVIDE A MINIMUM OF ONE 20 AMP RECEPTACLE IN AREAS DESIGNATED FOR LAUNDRY EQUIPMENT. (CEC 110.26)
3. KITCHENS AND DINING AREAS MUST HAVE A MINIMUM OF TWO 20 AMP CIRCUITS. KITCHEN COUNTER OUTLETS MUST BE INSTALLED IN EVERY COUNTER SPACE 12" OR WIDER, NOT GREATER THAN 4' O.C. AND WITHIN 24" OF THE END OF ANY COUNTER SPACE. (CEC 210.52f)
4. GFCI OUTLETS ARE REQUIRED FOR ALL KITCHEN RECEPTACLES THAT ARE DESIGNED TO SERVE COUNTERTOP SURFACES, IN BATHROOMS, IN UNDERFLOOR SPACES AT OR BELOW GRADE LEVEL, IN EXTERIOR OUTLETS, IN LAUNDRY AREAS, AND IN ALL GARAGE OUTLETS NOT DEDICATED TO A SINGLE DEVICE OR APPLIANCE. (CEC 210.8) ALL DWELLINGS MUST HAVE AT LEAST ONE EXTERIOR OUTLET AT THE FRONT AND THE BACK OF THE DWELLING. (CEC 210.52e)
5. RECEPTACLES MUST BE INSTALLED AT 12' O.C. MAXIMUM IN WALLS. WALLS LONGER THAN 2 FEET AND HALLS LONGER THAN 10' MUST HAVE A RECEPTACLE. A RECEPTACLE MUST BE PROVIDED WITHIN 3' OF BATHROOM SINKS. (CEC 210.52)
6. BOND ALL METAL GAS AND WATER PIPES TO GROUND. ALL GROUND CLAMPS MUST BE ACCESSIBLE AND OF AN APPROVED TYPE. (CEC 250.104)
7. FURNACES INSTALLED IN ATTICS AND CRAWL SPACES MUST HAVE AN ACCESS PLATFORM (CATWALK IN ATTICS, SLAB-ON-GRADE IN CRAWLSPACE), LIGHT, LIGHT SWITCH, AND RECEPTACLE IN THE SPACE. (CMC 904.10)
8. DWELLING TO HAVE A 120V POWERED SMOKE ALARM IN EVERY SLEEPING ROOM, OUTSIDE EACH SLEEPING ROOM, ON EVERY STORY OF THE DWELLING, INCLUDING BASEMENTS AND HABITABLE ATTICS, BUT NOT INCLUDING CRAWL SPACES OR UNINHABITABLE ATTICS. (R314.3)
9. SMOKE ALARM DEVICES SHALL BE INTERCONNECTED. (R314.4 & R315.7)
10. CARBON MONOXIDE ALARMS SHALL BE INSTALLED IN SLEEPING ROOMS WITHIN WHICH FUEL-BURNING APPLIANCES ARE INSTALLED, OUTSIDE OF EACH SLEEPING AREA, AND ON EACH OCCUPABLE LEVEL. CARBON MONOXIDE ALARMS ARE NOT REQUIRED IN DWELLINGS WHERE THERE IS NO FUEL-FIRED APPLIANCE OR ATTACHED GARAGE. (R315.1; R315.2)
11. ALL 120-VOLT 15 AND 20 AMP BRANCH CIRCUITS IN DWELLING UNITS EXCEPT THOSE IN BATHROOMS, UNFINISHED BASEMENTS, GARAGES AND OUTDOORS SHALL HAVE AFCI PROTECTION. (CEC 210.12)
12. RECEPTACLES ON 120-VOLT 15 AND 20 AMP CIRCUITS SHALL BE TAMPER RESISTANT. EXCEPT WHEN LOCATED MORE THAN 5.5' ABOVE THE FLOOR OR WHEN PART OF A LUMINAIRE OR APPLIANCE. (CEC 406.12)
13. VENT CLOTHES DRYER TO OUTSIDE OF BUILDING (NOT TO UNDERFLOOR AREA). VENT LENGTH SHALL BE 14' MAXIMUM AND THE VENT DIAMETER SHALL NOT BE LESS THAN 4". (CMC 504.4.2)
14. APPLIANCES AND RECEPTACLES INSTALLED IN GARAGES AND CARPORTS GENERATING A GLOW, SPARK, OR FLAME TO BE LOCATED 18" MIN. ABOVE THE FLOOR UNLESS LISTED AS FLAMMABLE VAPOR IGNITION RESISTANT. PROVIDE PROTECTIVE BOLLARD OR OTHER IMPACT BARRIER OR LOCATED OUT OF THE NORMAL PATH FOR VEHICLES. (CMC 305.1)
